PRODUCT SPECIFICATION

MONMOUTH

71023 CIRCULAR BENCH

The Monmouth is the perfect counterpart to the popular Chepstow. It has the same rugged construction but in a circular format which is ideal for making a centrepiece statement, installing around a tree, or just creating a social space. Heavy duty solid timber components securely morticed for durability along with the soft curving shape make this a very eye-catching (and comfortable!) product.

With widths ranging from an outside diameter of 1600mm (4 seater) to 2200mm (8 seater) they can be selected to suit whatever space is available. The seat height of 450mm is perfect for a pleasantly relaxed experience enjoying the sunshine!

As they are supplied in two sections they can also be configured in an S-shape.
