PRODUCT SPECIFICATION

METTRO 114

HVM PLANTER 64114

The Mettro HVM planter follows the same styling and coordination of the Mettro range with one significant difference - it is HVM rated to ISO 22343-1:2023. This enables it to withstand the impact of a 7.5-tonne truck moving at 50mph, making it an idea product for pedestrian protection in vulnerable areas.

The shallow foundation unit means it can be installed or retro-fitted with minimum disruption and the pleasant Mettro aesthetics enable it to sit alongside our range of benches and other products.

PRODUCT FEATURES

- Reinforced galvanised steel foundation
